

Hoover High School Prop S Project Locations

per the SDUSD plans presented to the public

Stadium Lighting was not included in the Assessment Report or the Prop S Bond Project List that went before the Voters. Cost to Taxpayers = over \$450,000 per field. This does not include the associated costs for operation and maintenance. The SDUSD plans to install stadium lighting at the remaining fields that currently don't have stadium lighting – a total of 8 fields. Three of these fields are located in congested residential neighborhoods which will be significantly impacted by night events if stadium lighting is installed. These schools include Hoover High, Crawford High, and Point Loma High.
